Education

University of California, San Diego – GPA: 3.68

September 2022 – June 2026

Bachelor of Science in Computer Science, Minor in Cognitive Science

La Jolla, CA

- Member of WIC (Women in Computing), TSE (Triton Software Engineering), PIB (Project in a Box), CSES (Computer Science and Engineering Society), and ACM (Association for Computing Machinery)
- Coursework: Data Structures & Algorithms, Databases, Linear Algebra, Web Development, Statistical Computing (R)

Experience

Instructional Assistant

January 2024 – Present

University of California, San Diego

La Jolla, CA

Discrete Mathematics Tutor

- **Tutored 20+ students per quarter** across a 100–200 person course in proofs, logic, set theory, and combinatorics; all attending students passed with **above-average exam scores**.
- Built a **supplementary textbook resource** on the course website mapping each lecture to correlated readings and **6 curated practice problems per topic**, receiving positive feedback from students and staff.

Tutor Apprentice Mentor

- **Mentored 20 of 50 course TAs**, conducting **live session drop-ins** and delivering structured feedback, performance evaluations, and individualized coaching to elevate tutoring quality.

Triton Software Engineering (TSE)

November 2023 – Present

Software Engineer & Developer Lead

La Jolla, CA

TEST Developer Lead (2025 – Present)

- **Managed end-to-end recruiting** for a 100-person org: screened **75 applications**, conducted **behavioral interviews** for 25 candidates, and selected a cohort of **7 engineers** from a competitive pool.
- **Engineering Manager**: led a **10-week full-stack bootcamp** (React, Node.js, MongoDB), running weekly sessions and **1:1s** to track individual progress.
- **Product Manager** bridging Dev/Design teams, driving cross-team communication, enforced engineering standards, and reported sprint progress in **weekly syncs** with club President and VP of Engineering.

TSE Developer (2024 – 2025)

- Engineered **full-stack features** for a nonprofit using **React, Node.js, MongoDB, and Firebase** in agile sprints.
- Drove code quality through **20+ pull request reviews and pair programming** in a cross-functional team of 13 engineers and designers.

TEST Developer (2023 – 2024)

- Accepted into a **competitive full-stack training program**: built foundational projects in Java and Python

Helicoid Industries Inc. 

June 2025 – August 2025

Software Developer & Marketing Outreach Intern

Remote

- Redesigned and developed the company website end-to-end (research → Figma → code), shipping **8 responsive pages** in **HTML/CSS/JS** — achieved **718 unique visitors** and **20% bounce rate** across 5 countries post-launch.

Code2040

September 2023 – September 2024

Computer Science Fellow

San Francisco, CA

- **Competitively selected** for a national CS fellowship advancing racial equity in tech; participated in industry workshops on career strategy, advocacy, and network-building within the tech ecosystem.

Projects and Publications

Psyches of Color Mobile App | *React Native, Node.js, Express.js, MongoDB*

Present

- Co-developed a **nonprofit cross-platform mobile app** (iOS & Android, pending App Store launch) delivering **culturally-responsive mental health resources** for Black and Latinx communities.
- Engineered **secure React Native components** with TypeScript, built **REST API endpoints** with Node.js/Express, and implemented **environment-based credential management** across frontend and backend.

RootsAI | *React, TypeScript, Figma, Whisper, Gemini, Letta*

April 2025

- **Won Best Use of Letta** at UCSD's 36-hour DiamondHacks (team of 4); built a **voice-powered multilingual AI web app** helping immigrant families navigate government assistance applications.
- **Frontend & UI/UX Lead**: learned React and built the entire frontend in **<24 hours**, translating Figma designs into production-ready React/TypeScript pages.
- Wired frontend to **Whisper** (speech-to-text), **Gemini** (LLM), and **Letta** (agent memory) APIs, delivering end-to-end **real-time AI-guided document assistance**; demoed to **10+ users** at the event.

YouLostIt | *STM32, Embedded C*

March 2025

- Co-built a **privacy-conscious embedded lost-tag tracker** on STM32, using an **accelerometer over I2C** to detect inactivity and trigger **Bluetooth LE alerts** and LED feedback.
